

## AG332 : AGROECOLOGY

An introduction to the theory and practice of agroecology. Resource management will be studied from horticultural, agronomic, economic, and environmental perspectives. Course will include a combination of lecture, field studies, and field trips that seek to connect agroecological concepts with applied practices in regenerative agriculture.

**Credits** 4

**Prerequisites**

[AG132](#) or [AG133](#) and Junior/Senior standing
